NAME

ovs−tcpundump − convert ''tcpdump −xx'' output to hex strings

SYNOPSIS

ovs−tcpundump < *file*

Common options:
      [**−h** | **−−help**] [**−V** | **−−version**]

DESCRIPTION

The **ovs−tcpundump** program reads **tcpdump −xx** output on stdin, looking for hexadecimal packet data, and dumps each Ethernet as a single hexadecimal string on stdout. This format is suitable for use with the **ofproto/trace** command supported by **ovs−vswitchd**(8) via **ovs−appctl**(8).

At least two **−x** or **−X** options must be given, otherwise the output will omit the Ethernet header, which prevents the output from being using with **ofproto/trace**.

OPTIONS

−h
−−help Prints a brief help message to the console.

−V
−−version
      Prints version information to the console.

SEE ALSO
